RE015 – Competitive App Research: Lifesum

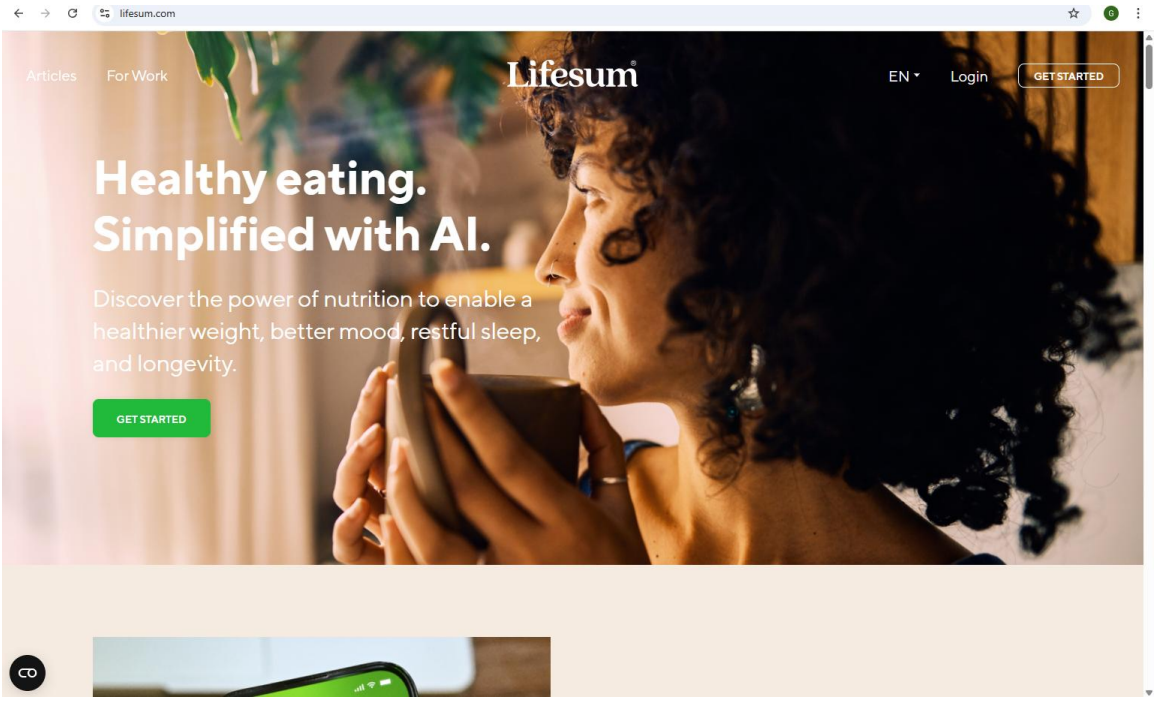
Lifesum is an AI-powered health and nutrition app designed to help users manage multiple health goals including dieting, exercise, and allergies. It combines intuitive meal logging, exercise tracking, and personalized plans to support sustainable health changes.

Core Features

- AI-driven meal planning: Lifesum customizes diet suggestions using user goals (e.g., keto, weight loss).
- Health goal integration: Supports overlapping goals—diet, fitness, allergies.
- Visual tracking: Daily calorie, macro, and water tracking visualized clearly.
- Adaptive UI: Colorful, modern design with engaging prompts and gamification.

Interface Overview

The UI supports intuitive food logging, visual progress bars, and habit-tracking through badges. The dashboard motivates users with goal completion stats and health trend analysis.

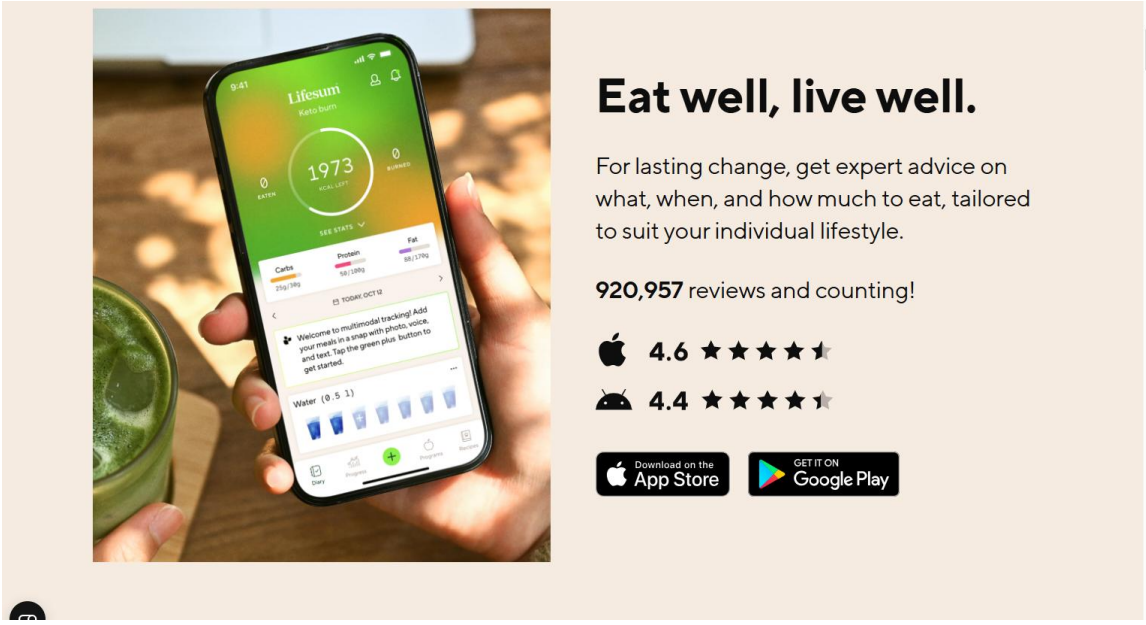


Customizability

Lifesum allows users to personalize their tracker—adjusting meal types, adding allergies, and syncing with Apple Health or Google Fit. This makes it highly flexible across different dietary needs.

User Ratings & Recognition

- IOS: 4.6★ (App Store), Android: 4.4★ (Play Store)
- Over 920,000 reviews
- Awards: App of the Year, Editor's Choice, Best of Google Play



Competitive Analysis Table

Functionality	Description
Barcode/Voice Logging	Log meals using barcode, voice, or photo input.
Personalized Plans	Set goals and receive AI-based meal and macro advice.
Calorie & Water Tracking	Monitor intake visually with progress rings.
Daily Affirmations	Motivational quotes and reminders to promote consistency.
Visual Progress	Track weight, nutrition, and exercise trends over time.
Smart Feedback	Receive evolving advice based on progress and goals.
App Store Recognition	Awarded by Apple and Google; over 900K reviews.

Recommendations for Food Remedy

- Implement AI meal recommendations and trackers.
- Enable support for overlapping health needs (e.g., diet + allergies).
- Incorporate badges, goal-setting, and feedback visuals.
